Commissioner of the government of the federal state for health care and nursing; Nursing and care spokesman of the FREE VOTERS parliamentary group in the Bavarian State Parliament; Spokesman on Franconia.

My priorities: As spokesman for care policy, I am committed to a form of care that does not lose its humanity. Nursing staff must be better off financially and relieved of bureaucracy; as an expert on health care, I am in favour of ensuring that all people receive a high level of medical care close to their homes. I therefore call for a new start in the health care system with the “Social Health Insurance” which I have played a leading role in developing; as a spokesman for Franconia, I want to make sure that our homeland is not placed at any disadvantages.
